In 2021, China's textile and garment exports reached 315.5 billion US dollars, a record high, with a year-on-year increase of 8.4%. It is understood that in 2021, supported by factors such as the rebound of overseas consumer demand and the return of some orders, China's clothing export reached US \$170.28 billion, a year-on-year increase of 24.0% and 16.0% compared with that before the epidemic, which was the best level since 2015, driving the export of textiles and clothing to a record high.
